

## STARK COUNTY MEDICAL MEN.

Complete List of the Doctors and the Names of Colleges

FROM WHICH THEY GRADUATED.

Valuable Information That is Cleaned From the Records at the County Probate Office—The Complete List.

With the advent of the microscope into the world and the wonderful increase in new diseases in the past few years there has been a loud call for help from the suffering and stricken people. Doctors as a result have been doing quite well and cornering the elusive dollars with more or less rapidity. There has also been quite an increase in the number of men and women in the profession in Stark county in the last few years. Very few of the doctors who practiced in the sixties are still at it now in this county but there are a lot of headless young men that have come in lately who are making a good effort to heal the sick and get rich at it.

Under the new law every man who wants to practice medicine must have passed through a medical college and been awarded a diploma and this must have been accepted by the state board and then registered in the probate court. An exception is made in the case of old practitioners who had practiced 25 years before the law was passed. All they had to do was to convince the state board that they had so practiced and they were given a certificate. This also must be registered with the probate court.

The records in Stark county show that there are 202 authorized doctors in the county. Of these 190 are college graduates having regular diplomas. Twelve were admitted to practice under the new law because they had been practicing for 25 years or more before the law went into effect.

Seventy-four doctors are registered to practice in Canton, 28 for Massillon, 27 for Alliance and the balance are distributed over the county. Hardly a town in the whole county is without a doctor.

There are nine women doctors registered for the county. Massillon has one, Alliance one, Marietta one, and Canton six.

Most of the Stark county healers are a home product, that is they are graduates of Ohio colleges. Outside of Ohio schools, Philadelphia comes second and has as many graduates here as any town in the country outside of Cleveland.

The colleges in the different towns represented have the following numbers of physicians registered:

Cleveland, 63; Philadelphia, 29; St. Louis, 3; Montreal, 3; Columbus, 29; Cincinnati, 23; Detroit, 2; Pittsburgh, 4; Albany, 1; New York, 6; Chicago, 16; Ann Arbor, 3; Buffalo, 1; Indianapolis, 1; Atlanta, 1; Louisville, 2; Lebanon, 1; London, 1; Brooklyn, 1; Knoxville, 1; Toledo, 1; Baltimore, 8; total, 190.

In the appended list, gleaned from the registration docket at the probate office, is shown the names of the doctors practicing in each of the towns of this county, the college from which they graduated, the town in which the college is located and the year they finished their studies and were admitted to practice. The record follows:

LEGAL PRACTITIONERS.

The dozen who never went through a college but who have been granted legal permission to practice medicine by the state board because they had been practicing twenty-five years are as follows:

Alfred D. Becket, Lima, Ohio.  
W. H. Becker, North Industry.  
John H. Sanor, Canton.

William James McConkey, Canton.  
J. D. Beuler, Louisville.  
Samuel T. Keith, Alliance.

W. O. Baker, Louisville.  
J. B. Roach, Alliance.  
Aaron Busby, Osnaburg.

Joshua Whiteleather, Osnaburg.  
Lewis J. Dales, Alliance.  
William Schooley, Minerva.

MIDWIVES.  
Besides the doctors who practice medicine the law provides that midwives must also be registered. They do not have to pass an examination but must comply with certain requirements before they are permitted to practice. Just two women have thus far been registered in the county for this work. They are as follows:

Amalia Fich, Massillon.  
Caroline Glodde, Canton.

Great Crowds and Enthusiasm Everywhere—Hasn't Said Anything About Dewey, But Talks About Imperialism.

Lincoln, Neb., April 28.—William J. Bryan has returned from his trip much enthused with the prospects for Democratic success in the far west, which portion of the country he has traversed and where he has made dozens of speeches. Mr. Bryan is in excellent health. Discussing the situation he said:

"The growing opposition in the west to the Republican party is too apparent to be questioned. Instead of losing votes on the expansion question, the Democrats will make large gains. My trip has convinced me that we will carry Washington without a doubt, while the chances of victory in Oregon are becoming more certain every day."

"The wage earners of the northwest find their expenses increasing, while the farmers who are getting no more for their crops, find themselves the victims of numberless trusts when they come to spend the proceeds of their crops. One of my largest meetings was held in an empty mill. It had been bought by the trust and then closed down."

"The prosperity now existing along the Pacific coast, and especially on Puget Sound, furnishes a splendid demonstration of the quantity theory of money. Trade there is flourishing, and times are prosperous. The people are reaping the benefits of an influx of money from the Alaskan gold fields and the trade with the Orient. The people are anxious to add to American commerce in the far east, but they are not willing to purchase trade by the shedding of human blood. The expense of commerce purchased at the cannon's mouth must be charged up against the profits."

"The sentiment against imperialism is steadily increasing, and the passage of the Puerto Rican bill has opened the people's eyes as to the true intents of the Republican party. The people want the Philippine question settled along American lines, and the treatment of the Puerto Ricans holds out no hope for anything different for the Filipinos. There is a growing sentiment that the nation should announce its purpose as to the future of the Philippines, then establish a stable self-government and protect that government from outside interference just as we have done with the republics on the two American continents. No other course is consistent with the traditions and history that have made the nation great."

During his tour, Mr. Bryan says he found no inclination on the part of any of his supporters to abandon the silver question. It is his opinion that there are more opponents to the gold standard and the money trust today on the coast than when he visited there before. The issue has in no way been blotted out nor even dimmed by later ones, and Mr. Bryan says he never makes a speech without touching on the three questions, money, trusts and imperialism. It is for the Kansas City convention to place their relative importance.

Mr. Bryan says at no time or place has he discussed the candidacy of Admiral Dewey. He was told that one interview published recently quoted him as having extended his sympathy to the admiral.

"That is untrue," he said. "What I did say when asked to give my views concerning the admiral's candidacy, was that there were so many questions I have had to talk about that it was gratifying to find one that I did not have to discuss."

Cut in Two By a Train.

Stuebenville, April 28.—John Barchie, a Hungarian boy, aged 7 years, was instantly killed on the W. & L. E. siding at Long Run last night. He was playing in a gondola and was hanging over the side when empty cars, shoved in on the siding, struck the car, jolting the boy out and the wheels cut him in two. It was an hour before he was discovered.

T. W. McCarthy has been appointed assistant general foreman of the Canton W. & L. E. R. shops. Mr. McCarthy for the past 12 years has been connected with the Cheyenne shops of the Union Pacific company, previous to which he was with the Brooks Locomotive works.

## WINE OF CARDUI

WOMEN WHO WORK.

St. Louis, Mo., Aug. 13.  
Though only 19 years old, I suffered from pains and female troubles two years. Last spring I got so bad I had to quit work. I had to support myself, and could not afford a high-priced doctor. I got one bottle of Wine of Cardui and that made me feel better. Have now used several bottles and am well. My mother used the Wine for Change of Life and was greatly relieved.  
MISS MARGARET WALSH.

Wine of Cardui

Many girls and women find it necessary to earn their own living in various kinds of employment. Their work is often so hard and confining that the health breaks down. Their delicate constitutions are unfitted for tiresome tasks. Weakness nearly always makes its appearance in the peculiarly delicate womanly organs. Constant standing on the feet, and coming and going at the beck of a superintendent or foreman, induces falling of the womb, leucorrhoea, headache and backache. The pay of women workers is often so notoriously small that when sickness comes they have no money to engage skillful physicians. To them Wine of Cardui is truly a blessing. It cures them of their ills at a small cost, and they can act as their own physicians. No doctor can do as much for "female troubles" as Wine of Cardui.
